

## Testing the CAC's UDRP Platform

We are delighted to present you an easy and flexible possibility how to familiarize yourself with our new UDRP on-line platform.

You can access our Test Platform which is available on: <http://udrp.expert4me.com/>. All you need to do is to click onto the on-line platform in the main menu, register your name and details and then follow the instructions.

If you have any technical difficulties, please contact the UDRP Support Team who you can reach by e-mailing [support@expert4me.com](mailto:support@expert4me.com).

There are several important points to note about the Test Platform:

- The Log-in information you receive for the Test Platform will not work on the Live Platform.
- The Test Platform is not protected by a digital certificate issued by a recognized international certification service provider. The Live Platform has received a digital certificate from Verisign.
- We do not want you to use data from live UDRP cases on the Test Platform. Data from old cases with the names changed or dummy cases is all that you need.
- You can request the Chess Card which will enable you to test full eFiling on the Test Platform. However, for the purposes of your testing, you will only be sent a soft copy. (On the Live Platform, participants will be sent a hard copy of the Chess Card).
- Do not test the option to pay by a credit card, you would need real data and this is outside the scope of your review. This payment option has been implemented though and the users will be able to use it in the Live Platform.
- Everything that you submit on the Test Platform will be treated as Test Data. The Platform will not generate emails to third parties, ICANN or registrars although for the sake of your testing, it will appear as if such emails have been sent and confirmations received.
- There will be no administrator to administer your test cases, no decisions will be issued in the Test Platform etc. The Test Platform serves only for you to get used to the on-line platform before you start using the Live Platform.

In addition to your testing our Test Platform you can participate in one of our training webinars – please click on the section Webinars in the left-hand menu to know when will the webinars be organized and how to register for them.
